

1. Change the datatype of Auto year column from number to date.

Steps in Tableau

1. Open **Tableau Public/Desktop**.
2. Connect to **insurance.xlsx**.
3. Go to the **Data Source** page.
4. Find the column **Auto year**.
5. Click the data-type icon beside Auto year.
6. Change it from **Number (Whole)** to **Date**.

2. Display day wise policy bind date vs capital gain using discrete and continuous axis.

Step 1 — Add Policy Bind Date Drag:

Policy Bind Date → Columns

Step 2 — Add Capital Gain

Drag:

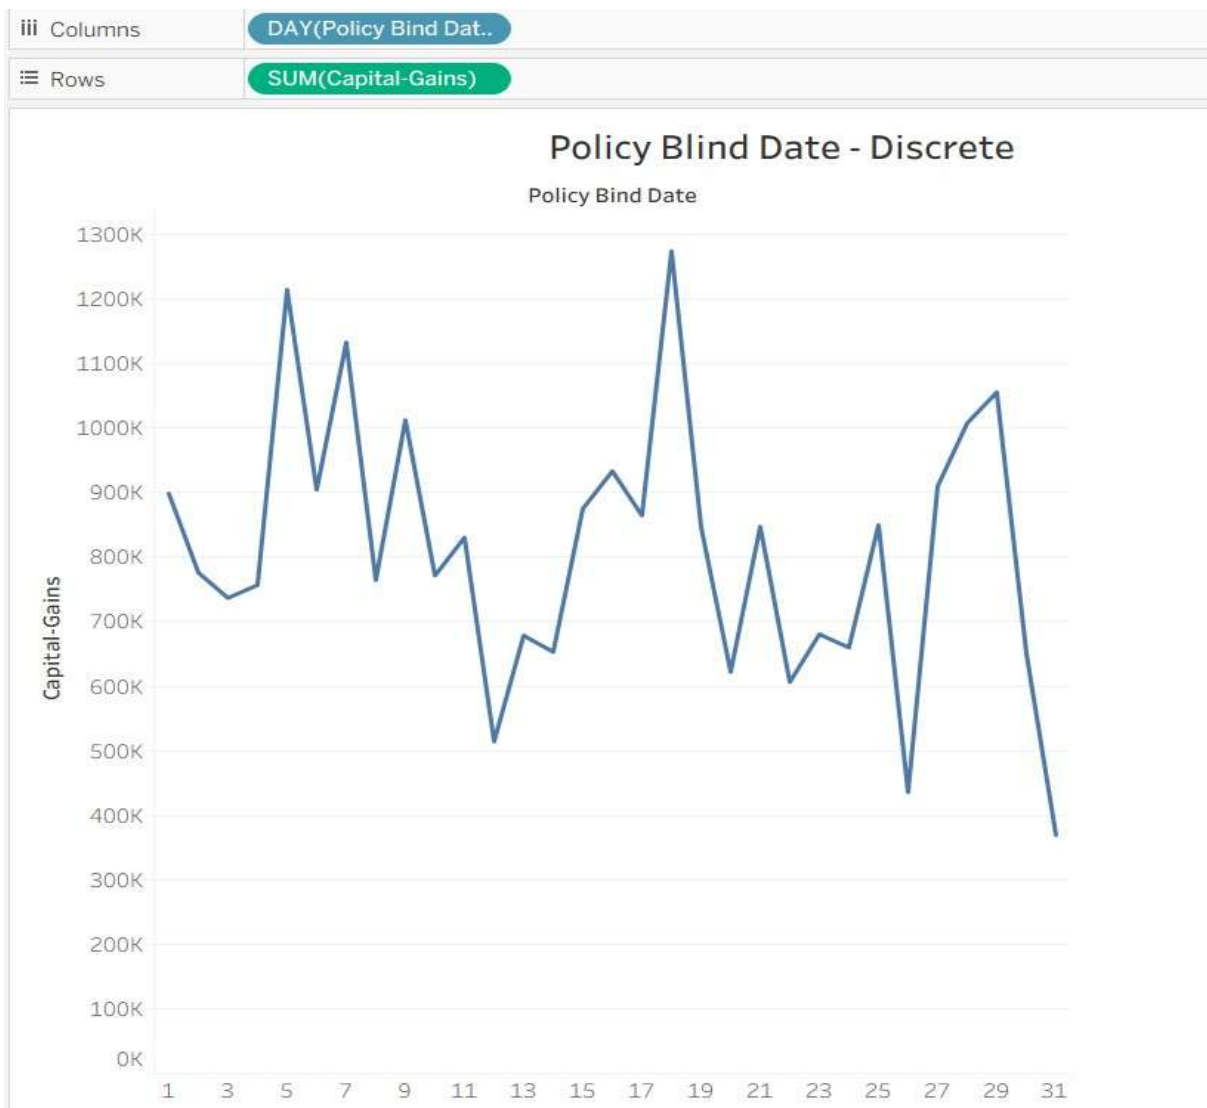

Capital Gains → Rows

Your chart should look approximately like:

X-axis: Day-wise Policy Bind Date

Y-axis: SUM(Capital Gains)

Step 3 — Right Click on Column → Policy Blind Date → Select Discrete → Day

Step 4 — Right Click on Column → Policy Bind Date → Select Continuous → Day

3. What are the Measure Names and their Values?

Measure Names

Measure Names contains the names of all measures in your dataset.

For example:

- Capital Gains
- Capital Loss
- Claim Amount
- Policy Annual Premium
- Policy Deductible
- etc.

Measure Values

Measure Values contains the actual aggregated values of those measures, such as:

- SUM(Capital Gains)
- SUM(Capital Loss)
- SUM(Claim Amount) • AVG(Policy Annual Premium)
- etc.
